PRECISION PLASTICS

TechTips

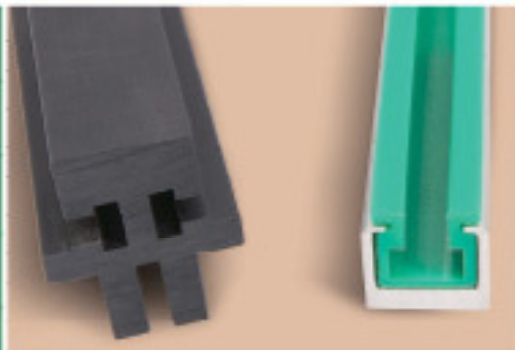

## CUSTOM PARTS AND FITTINGS

Off-the-shelf fittings are not always suitable. Special features such as threads, collars, flanges, and grooves may be needed to adapt to specific components. Our large CNC lathe can mass-produce such parts up to 4" outside diameter. Larger parts are made on semi-automatic lathes or CNC routers. The largest sprocket made to date was a 48" OD nylon sprocket for a poultry conveyor. Large or small parts, large or small quantities: we welcome them all. Custom plastic parts are our specialty. Some examples are shown.
