## METAL-FREE CONVEYOR ROLLERS

A new product from Technicor can reduce costs and help guarantee food quality. METAL-FREE conveyor rollers are ideal for food-processing areas where metal detectors need to function flawlessly or where wash-down solutions prohibit any metal content. Rollers, bearings, shafts and “hardware” are all plastic. The ball-bearings are fitted with glass balls and nylon or acetal 7/16” hex shafts. Fit them into UHMW slotted side rails and you have a METAL-FREE conveyor!
