

TECHNICOR EXPANDS CNC ROUTER CAPACITY

The recent purchase of a third CNC router table has greatly boosted Technicor's production capacity. Our first CNC router table was purchased in 1996, followed by a larger, faster, and higher precision 4' X 12' table in 2005. The latest addition includes further tooling and software improvements, resulting in faster and more accurate parts production. The extra machine capacity is expected to reduce bottlenecks and shorten lead times. It is our goal to supply precision-machined plastic parts from our Orangeville plant in 5 – 10 working days. Thank you for your continued patronage.

When you think of plastics, think of Technicor Precision Plastics.
