PERMA-BOLT POLYMER THREADED RODS

Perma-Bolt rods and nuts are manufactured from a vinylester-based fibreglass-reinforced plastic material. They are lightweight, fire retardant, electrical and thermal insulating, and resistant to chemicals that attack ordinary steel fasteners. Vinylester has superior properties in corrosion resistance and low water absorption: a

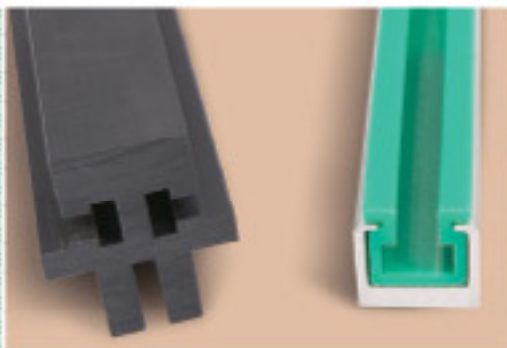

logical and practical solution for demanding applications in hostile environments.

Perma-Bolt is available in 5 sizes and is stocked in 8 foot lengths. Cut-to-size lengths are available upon request. Call Technicor for pricing at 1-800-858-1707.

When you think of plastics, think of Technicor Precision Plastics
